OPTIONS TO FIT YOUR BUSINESS NEEDS

MCS | PaaS (Platform as a Service)

- Everything in the Cloud

This complete package provides all the technological infrastructure and software, including ManitouNEO or ManitouPSIM, servers, receivers, PBX, and telecom lines.

MCS | SaaS (Software as a Service)

- Software and servers in the Cloud

A package for businesses who already have receivers and telecom lines they wish to utilize.

MCS | Bold Cloud Receiver (Cloud Infrastructure)

- Receivers and telecom in the Cloud

A package for those who prefer to keep their servers and database on-site, and avoid additional infrastructure costs for receivers and telecom.

MCS | Now (Turnkey)*

- Everything in the Cloud

A turnkey solution for smaller monitoring centers. Get our basic alarm monitoring software package and telecom with log-in access in the Cloud.

MCS | DR 90/10 (Disaster Recovery 90/10)

- 90% of signals on-premises
- 10% of signals through the Cloud

This package allows you to run 10% of your signals through the Cloud with immediate failover for the other 90% in the event of an emergency. Use this solution to meet your UL 827 secondary site requirements.

**coming soon*

MCS | DR (Disaster Recovery)

- Data replication in the Cloud

A Disaster Recovery solution which keeps your data replicated in the Cloud for failover. In the event of an emergency, your telco provider will swing your lines to our receivers.
