

Manitou®LITE

Alarm monitoring software
designed for simplicity.

ManitouNEO Lite is the perfect alarm monitoring software for colleges, universities, corporate proprietary monitoring centers, and small, localized central stations. ManitouNEO Lite utilizes the same power of ManitouNEO, but with less of the complexity required for larger monitoring centers.

SIMPLE, BUT SOPHISTICATED

With ManitouNEO Lite, alarm handling is simple. The Windows-based interface is easy to use and requires minimal training. Because it's web-based, it can be viewed on any number of compatible devices. The alarm queue shows all pending alarms by priority and color depending on alarm status. Operators can select an alarm from the queue and follow step-by-step instructions to facilitate consistent and efficient handling of alarm events.

A LOW-COST SOLUTION

ManitouNEO Lite features not only a lower purchase cost, but is packaged to include your installation. The shorter installation time also means you are up and running faster. Save time and money on dispatcher training as well, with up to 16 hours of online training included with your purchase. Both veteran and new operators will be able to start using ManitouNEO Lite quickly and easily.

ROBUST FEATURES ON A SMALLER SCALE

ManitouNEO Lite includes a wide variety of features for smaller alarm monitoring needs.

- Web-based and accessible from a variety of devices
- Unlimited user profiles and user groups
- Dynamic screens use screen space efficiently on all sizes of desktop monitors
- Multiple fields for key-holder phone numbers, passcodes, and user IDs
- Customizable action patterns, with step-by-step instructions and scripting
- Flexible scheduling with alarm events for unscheduled or late open/close
- Single-click history retrieval
- Over 80 report options
- Customer activity log

POWERFUL REPORTING

ManitouNEO Lite includes valuable reporting tools. Select from a variety of reports, including signal and activity, alarm resolution, account status, and customer data. Customize them to your needs and view on screen, print, or email them.

READY FOR GROWTH

With ManitouNEO Lite there are minimal growing pains as your business expands. When you reach the point where you require more from your automation software, simply choose an upgrade path to the ManitouNEO package which best suits your business needs.

No data conversion is necessary and only minimal training time is needed to bring you and your staff up-to-date on the expanded capabilities of Bold's flagship product.
