

SedonaOffice Cloud Services is a hosted solution for your financial management system. The solution drives flexibility, enabling connection from anywhere via the internet. This relieves customer organizations of the need to manage infrastructure and software. The solution also helps customers achieve ease-of-use and reduced total cost of ownership (TCO).

REMOVE SERVER STRESS

Our fully hosted solution removes the need to house and manage servers and other on-site infrastructure.

85% of organizations will be moving to the cloud in the next 3 years¹

ACCESS FROM ANYWHERE

Empower your team to work where needed. Access SedonaOffice from any computer anywhere via the internet.

89% of people prefer the option to work remotely²

REDUCE STAFFING CHALLENGES

Forget about the need to hire, train and retain specialized staff for a 24/7 IT operation. We'll take care of it.

It takes 66 days on average to fill an IT role³

A Fully Hosted Cloud Solution Relieving Organizations of the Need to Manage Infrastructure or Software Updates

Any Computer. Any Time.

Don't be tied to one PC. The solution allows employees to access SedonaOffice anytime from any computer with a web browser and an internet connection.

Software Licensing Managed

Don't worry about which employee or which machine has a software license. Our fully hosted solution ensures compliance.

Hardware Maintained

Our fully hosted solution means you'll no longer have to worry about unexpected repairs or regularly scheduled maintenance. We handle it all.

Reduced Total Cost of Ownership

Our solution enables significant cost reduction across the business, including hardware, software and staffing.

Software Updated

Our fully hosted solution handles all software updates anytime they're needed, enabling your IT team to focus on more important tasks.

"I love that I can access SedonaOffice from any location. We've become more efficient as a business because we can get our work done whenever and wherever we need to."

Judi Perrill

Vice President, United Security Systems
